As a software engineer, I am committed to leveraging my problem-solving skills and technical expertise to deliver innovative solutions and drive impactful projects within collaborative team environments. I am currently seeking opportunities to further enhance my capabilities and contribute to a dynamic organization.

Professional Experience

Motus IT

02/2024 - Present

Junior Full Stack Software Engineer (Contract)

- Building responsive web applications using the Model-View-Controller pattern with ASP.NET Core MVC
- Developing API's that allow communication between systems over the web, typically using HTTP protocols
- Using C# to implement backend logic like sending emails and SMS notifications to customers for policies and claims ,attaching documents, and develop console apps to clear log files from the database.
- Creating responsive and user-friendly web interfaces with HTML, styling with CSS, enhancing design with Bootstrap, and adding interactivity using JavaScript.
- Collaborating with product owners and the BA team to gather requirements and translate them into technical specifications.
- Utilizing Dynamics 365 CRM to manage policy registrations, process claims, generate invoices, and handle leads and sales orders to support business operations.
- Using Microsoft SQL Server to manage business data, process transactions, and support reporting, with stored procedures for efficient data handling and automation
